

WTS is a growing integration, consulting and engineering firm that specializes delivering high-quality technical solutions to the federal government.

We are exclusively a government provider of integration, consulting and engineering services.

MAKING A DIFFERENCE WITH DIGITAL GOVERNMENT

Integration, Consulting
and Engineering

Integration, Consulting
and Engineering

Our understanding of all types of federal challenges helps us deliver the promise of Digital Government by adhering to the following federally-defined approaches:

- ✔ "Information-Centric" – Move from managing "documents" to managing discrete pieces of open data and content.
- ✔ "Shared Platform" – Working within and across agencies, to reduce costs and streamline development.
- ✔ "Customer-Centric" – Create, manage, and present data through to allow customers to shape, share and consume information.
- ✔ "Security and Privacy" – Ensures innovation happens in a way that protects information and privacy.

DIGITAL GOVERNMENT: USING TECHNOLOGY TO MAKE A DIFFERENCE

Whether it's software development, cloud computing, mobile solutions, or technology integration, WTS helps government respond to an ever-changing landscape. We work along-side federal executives to deliver and receive digital information and services anytime, anywhere on any device. WTS understands the Digital Government of the future.

WTS AND THE DIGITAL STRATEGY

WTS has the expertise and experience to successfully accomplish the goals of Digital Government. We consistently provide high-quality digital government information and services. We adjust to the new digital world by providing new devices, applications, and data in smart, secure and affordable ways. We unlock the power of government data to spur innovation and improve the quality of services for the American people

Digital Government and Making a Difference

Case Study: EAGLE

When Homeland Security (Immigration and Customs Enforcement) needed a new booking and investigation system - the single-most critical investigation system in the agency - they came to WTS for the creation and delivery of EAGLE. The EAGLE system is now used nationwide by thousands of agents.

WTS worked closely with law enforcement officers to realize Digital government goals by integrating desktop, mobile and hardware technology with data to create a high-quality federal system available anywhere, anytime.

- ✓ Highly-secure and available law enforcement data for agents and executives
- ✓ Desktop and mobile interfaces for fully integrated anywhere, anytime use
- ✓ Comprehensive case-management system for cross-departmental use
- ✓ Integrated biometrics devices for both desktop and mobile systems
- ✓ Multi-integrated database system national for Biometric Identification

These capabilities address all the pillars of the Digital Government strategy while providing improvements in agency processing time, data quality and overall user satisfaction.
